

SOFTWARE DYNAMICS GROUP

Junior D365 CE Developer (C# / .NET)

+ Company Overview: [Software Dynamics](#)

Software Dynamics is a leading Microsoft Dynamics Implementation and Consulting Partner based in Nairobi, Kenya. We specialize in delivering sophisticated Enterprise Resource Planning (ERP) and Customer Engagement (CE) solutions built on the Microsoft stack, empowering businesses across Africa. We are an elite Microsoft partner dedicated to large-scale enterprise solutions and a technically driven work culture.

Position: [Junior D365 CE Developer \(C# / .NET\)](#)

Location: Nairobi, Kenya

Employment type: Full-Time

Application Deadline: 14 May, 2026

Role Overview

Role Overview This role is designed for an entry-level developer looking to specialize in Dynamics 365 Customer Engagement (CRM). You will leverage C# and JavaScript to build robust solutions that enhance customer relationship management.

+ Key Responsibilities

- Develop custom plugins, workflow activities, and actions using C# and .NET.
- Customize the D365 CE front-end using JavaScript and Web Resources.
- Support the configuration of entities, forms, views, and security roles.
- Assist in integrating D365 CE with third-party applications using APIs.

+ Qualifications

- Proficiency in C# and the .NET Framework.
- Familiarity with web technologies (HTML, CSS, JavaScript).
- Knowledge of the Power Platform (Power Apps, Power Automate) is a plus.
- Excellent problem-solving skills and attention to detail.

+ Benefits and Perks

- **Competitive Compensation:** Performance-based package with attractive commission structures.
- **Health & Wellness:** Comprehensive health coverage and generous paid time off.
- **Professional Growth:** Continuous investment in professional development and Microsoft sales certifications.
- **High-Performance Culture:** Join a collaborative environment working on the most significant digital transformation projects in the region.
